

Advantage Plus™

Late Summer

A P P L I C A T I O N

Your late summer application is designed to maintain growth, color and vigor in the late summer months. The fertilizer is specially blended to help your lawn recover from the heat stress of summer. Broadleaf weed control has been applied as needed.

Watering:

Please refrain from watering for 30 minutes after the application. A light rain will not affect this application. Whenever possible, complete all watering between 6 and 8 am. Continue the deep watering and avoid light shallow watering. Additional watering will be needed for dry spots. Your lawn will require more water due to the summer's warm temperatures.

Mowing:

Keep the mower blade height at its highest setting for the remainder of the growing season. The proper height will result in a greener lawn. The blade should be sharpened every 4-6 mowings for best results.

Cultural Notes:

Summer will soon be coming to an end. Swingle is currently scheduling fall aerations. This helps your lawn recover from summer heat. If problems occur or to schedule your fall aeration, please call Swingle.

Your next lawn application:

For the Advantage Plus™ program your next application will be in 5-7 weeks. For the Basic Advantage Plus™ program your next application may not be for 8-12 weeks, or when you selected to have your next application.

A 100% guarantee that all work will be done correctly and to your complete and total satisfaction.
